

Upgraded Cabin Filter System (MERV 15)

- 100% synthetic media is highly effective at removing 0.3 – 10.0 micron particles from the air stream
- Removes airborne pathogens, mold, and pollen from the air stream
- Resists moisture and microbial growth
- High dust loading for maximum service life while reducing airflow resistance
- Withstands prolonged exposure to high temperature, high humidity, and consistent UV exposure
- Can be Installed in New and Pre-Owned Coaches

- MERV 15 filter is two levels above recommended requirements for COVID-19

MERV 13 filters capture airborne viruses and bacteria from coughs and sneezes from coronavirus, clean air helps keep your immune system strong.
